

Workflow of the Online Complaint Registration Management System

1. User Registration

a citizen who notices a damaged streetlight in his locality, visits the **Online Complaint Registration Management System**. He registers by entering his full name, email address, mobile number, and password. After successful registration, he logs into the system and accesses his personal dashboard.

2. Browsing Departments & Complaint Categories

Ravi explores the available government departments, such as:

- Municipal Department
- Electricity Department
- Water Supply Department
- Police Department
- Health Department

He selects the **Electricity Department** and chooses the complaint category "**Streetlight Not Working.**"

3. Lodging a Complaint

clicks on "**submit**" and fills out the complaint form by providing:

- Complaint Title
- Complaint Description
- Department
- Complaint Category
- Location
- Priority Level

He uploads a photograph of the damaged streetlight and submits the complaint. The system generates a unique **Complaint ID** and displays a confirmation message indicating that the complaint has been successfully registered.

4. Complaint Confirmation & Assignment

The complaint is automatically forwarded to the Electricity Department. A department officer reviews the complaint and assigns it to the appropriate field technician. Ravi receives an email and SMS notification containing the Complaint ID and the current complaint status.

5. User Complaint Manage

Through his dashboard, Ravi can:

- View all submitted complaints
- Track complaint status
- Edit the complaint before processing (if permitted)
- Cancel a complaint
- Reopen a resolved complaint (if necessary)
- View officer remarks and updates

The complaint status changes as follows:

- Submitted
 - Under Review
 - Assigned
 - In Progress
 - Resolved
 - Closed
-

6. Admin Approval (Background Process)

The system administrator verifies newly registered officer accounts before granting access. The admin assigns officers to their respective departments, manages user roles, prevents spam complaints, and ensures that only authorized personnel can access the complaint management system.

7. Platform Governance

The administrator continuously monitors platform activities by:

- Tracking complaint statistics
- Handling escalated complaints
- Resolving disputes between users and officers
- Monitoring system performance
- Generating reports and analytics
- Maintaining database security and user privacy

This ensures smooth operation, transparency, and accountability throughout the complaint resolution process.

8. Officer Dashboard & Complaint Management

The assigned officer logs into the Officer Dashboard and views all complaints assigned to their department. The officer can:

- View complaint details
- Update complaint status
- Add action notes
- Upload supporting documents or images
- Request additional information from the complainant
- Submit a resolution report

Each update is automatically reflected on the user's dashboard.

9. Field Visit & Complaint Resolution

The assigned technician visits the complaint location and resolves the reported issue. After completing the work, the officer updates the complaint status to **"Resolved"**, uploads photographs as proof of completion, and adds remarks describing the actions taken.

Ravi receives a final notification confirming that his complaint has been resolved. He can review the resolution details, provide feedback, and rate the quality of service before the complaint is officially marked as **Closed**.

1. USER REGISTRATION

Ravi registers on the Online Complaint Portal by providing his details.
