

Online Complaint Registration Management System

User Roles and Workflow

1. Customer / Ordinary User

Role

The Customer (Citizen) is the primary user of the system. The customer registers on the platform, submits complaints related to public services, tracks complaint progress, communicates with the assigned officer, and manages personal profile information.

Workflow

Step 1: Registration and Login

The customer visits the Online Complaint Registration Portal and creates an account by entering:

- Full Name
- Email Address
- Mobile Number
- Password

After successful registration, the customer logs in securely using the registered email and password.

Step 2: Complaint Submission

After logging in, the customer clicks "**Submit Complaint**" and fills in the complaint form with:

- Complaint Title
- Complaint Category
- Department
- Description of the Issue
- Location
- Priority Level

- Contact Information
- Supporting Images or Documents

After submission, the system generates a unique Complaint ID and sends a confirmation notification.

Step 3: Complaint Status Tracking

The customer can monitor complaints from the dashboard.

Complaint statuses include:

- Submitted
- Under Review
- Assigned to Officer
- In Progress
- Resolved
- Closed

The dashboard also displays the complaint history and expected resolution progress.

Step 4: Interaction with Officer

The customer can communicate with the assigned officer through the messaging section by:

- Sending additional information
- Uploading extra documents
- Replying to officer queries
- Viewing officer remarks

Step 5: Profile Management

The customer can update:

- Personal Information
- Contact Number
- Email Address
- Residential Address
- Password
- Profile Picture

2. Officer (Department Officer)

Role

The Officer is responsible for handling complaints assigned by the administrator, communicating with users, updating complaint progress, and ensuring timely resolution.

Workflow

Step 1: Registration and Login

Officer accounts are created and verified by the Administrator.

After approval, officers log in using their official credentials.

Step 2: Complaint Management

The Officer Dashboard displays:

- Assigned Complaints
- Complaint Priority
- Complaint Category
- User Details
- Complaint History

The officer can search, filter, and organize complaints.

Step 3: Status Update

The officer reviews complaints and updates their status, such as:

- Under Review
- Technician Assigned
- In Progress
- Waiting for User Response
- Resolved
- Closed

Each update automatically notifies the customer.

Step 4: Customer Interaction

The officer communicates with customers by:

- Answering questions
- Requesting additional documents

- Providing progress updates
- Uploading work completion photographs
- Recording action notes

Step 5: Resolution Report

Once the issue is resolved, the officer:

- Uploads resolution evidence
 - Adds final remarks
 - Marks the complaint as **Resolved**
-

3. Administrator

Role

The Administrator manages the overall platform by supervising users, officers, complaints, departments, and system security.

Workflow

Step 1: Complaint Monitoring

The administrator monitors:

- Total Complaints
- Pending Complaints
- Active Complaints
- Resolved Complaints
- Department Performance

Step 2: Complaint Assignment

The administrator assigns complaints to officers based on:

- Department
- Workload
- Expertise
- Complaint Priority

This ensures efficient handling and balanced workloads.

Step 3: User and Officer Management

The administrator can:

- Approve or reject officer registrations
- Manage user accounts
- Reset passwords
- Block or activate accounts
- Assign departments and permissions

Step 4: Platform Governance

The administrator ensures:

- Complaint transparency
- Data security
- User privacy
- Spam complaint prevention
- Policy enforcement
- Escalation handling

Step 5: Reports and Analytics

The administrator can generate reports including:

- Daily Complaint Reports
- Monthly Complaint Reports
- Department-wise Statistics
- Officer Performance Reports
- Complaint Resolution Rate
- User Activity Reports

These reports help evaluate system performance and improve public service delivery.

Overall System Flow

Customer Registration → Login → Submit Complaint → Complaint Assigned by Admin → Officer Reviews Complaint → Officer Updates Status → Technician Resolves Issue → Officer Uploads Resolution → Customer Receives Notification → Customer Reviews Resolution → Complaint Closed

This workflow provides a secure, transparent, and efficient complaint management process by connecting citizens, department officers, and administrators on a single platform.
