

Step 1: Creating the Project Folder

1. Create a new folder named **Online-Complaint-Registration-System** in your desired location (for example, on the Desktop).
2. Open **Visual Studio Code**.
3. Click **File** → **Open Folder** and select the **Online-Complaint-Registration-System** folder.
4. Open the integrated terminal by selecting **Terminal** → **New Terminal**.
5. Verify that you are inside the project folder by running:

```
cd Online-Complaint-Registration-System
```

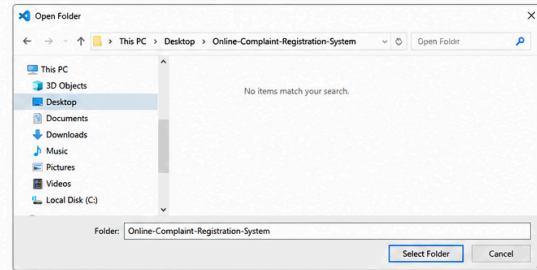

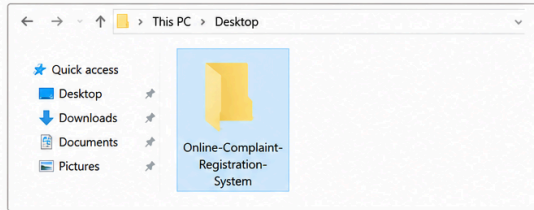

6. Create the project structure by adding two main folders:

```
Online-Complaint-Registration-System/  
├── client/      # React.js frontend  
└── server/     # Node.js and Express.js backend
```

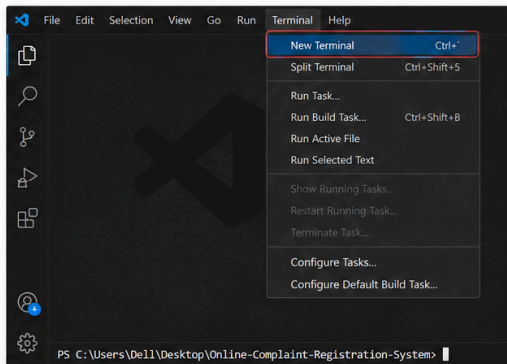

7. The **client** folder will contain the React application, including pages, components, assets, and API services.
8. The **server** folder will contain the Express.js application, including controllers, models, routes, middleware, configuration files, and the MongoDB connection.
9. This folder structure provides a clean separation between the frontend and backend, making the project easier to develop, test, and maintain.

STEP 1: CREATING PROJECT FOLDER

1. Create a new folder named **Online-Complaint-Registration-System** on your Desktop.
2. Open Visual Studio Code.
Click **File** → **Open Folder** and select **Online-Complaint-Registration-System**.

3. Open the integrated terminal in VS Code
(**Terminal** → **New Terminal**).

4. Verify that you are inside the project folder.
Run the command:

```
PS C:\Users\Dell\Desktop\Online-Complaint-Registration-System> pwd
Path
----
C:\Users\Dell\Desktop\Online-Complaint-Registration-System
PS C:\Users\Dell\Desktop\Online-Complaint-Registration-System> _
```

5. Create the project structure.

```
Online-Complaint-Registration-System/
├── client/ (React.js frontend)
└── server/ (Node.js & Express.js backend)
```

Structure Overview

- **client** – Contains the React frontend application.
- **server** – Contains the Node.js, Express.js backend and MongoDB connection.

💡 Your project folder is now ready with a clean structure to build the **Online Complaint Registration and Management System**.
